McKinnon Creek Pedestrian Trail
Planning for the Future

Trail Construction

Step 3:
Work Inside Wetland
-Spring 2014
-LFP Municipal Code requires special conditions for wetland crossings

Phase II Construction:
Work Inside of Wetland

There are likely three wetlands on the project site. Photos demonstrate that even in dry months, land is wet and vegetation is conducive to wet conditions.

Work Inside of Wetland will Require:
1. Additional environmental permitting
2. Engineering design of wetland crossing and construction by qualified professional
